DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
- I. Claims 21-22, 23-24, 25-26, and 27-33, drawn to a method of configuring a plurality of computer entities into a plurality of groups comprising at least one processor, one storage device; a network connection for communicating with the other computer entities in the same group as said at least one data processor, each group performing the following steps assigning a one said computer entities to be a master computer entity of a particular group, the at least one data processor and at least one data storage device of said master computer entity being arranged to provide the functionality if said master computer to one or more slave computer entities of the particular group, etc., classified in 709, subclass 208.
- II. Claims 34-44 drawn a computer network comprising a management console having user inputs, and a processor including an operating system and a network connection for communicating with a computer entity of the network; a master headless computer entity coupled to be responsive to commands from the management console resulting from the user inputs; etc., classified in 709, subclass 223.
- 2. The inventions are distinct, each from one another because of the following reasons:

 Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is

Application/Control Number: 09/800,100

Art Unit: 2157

useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species

Page 3

are patentably distinct (MPEP § 806.04(h)). Should applicant traverse on the ground that the

species are not patentably distinct, applicant should submit evidence or identify such evidence

now of record showing the species to be obvious variants or clearly admit on the record that is

the case. In either instance, if the examiner finds one of the inventions anticipated by the prior

art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other

invention.

3. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required

for Invention I is not required for Invention II, restriction for examination purposes as indicated

is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art because of their recognized divergent subject matter, restriction for

examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an 6. election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

A telephone call was made to Attorney Randy Noranbrock regarding the Election/Restriction requirement. There was no response to this restriction.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LaShonda T Jacobs whose telephone number is 571-272-4004. The examiner can normally be reached on 8:30 A.M.-5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on 571-272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
